PROFILE

My point of view, and a few thoughts on my profession:

I enjoy being at the forefront of technology and am focused on connecting everyday users with emerging technologies. I became interested in coding at an early age, and after practicing design in silicon valley for years, I'm excited to be doing it myself!

I really love street biking, live comedy, live music, and problem solving. I enjoy meeting new people and learning new things :)

SKILLS

- HTML
- Javascipt
- CSS
- jQuery
- Responsive Design
- MongoDB
- MySQL
- Express
- Node.js
- React.js

EDUCATION

Full-Stack Development Certificate   Fall 2021
University of Minnesota

UX Certificate   Summer 2019
Brainco (Minneapolis, MN)

BFA in Graphic Design   2000 - 2004
University of Minnesota Duluth

- Cum Laude, 2004
- Departmental Honors, 2004

EXPERIENCE & TRAINING

Full Stack Coding Bootcamp   Fall 2021
University of Minnesota

Throughout this 3+ month bootcamp we learned and practiced professional development on a wide array of projects.

The program was designed to teach us everything from client side HTML and CSS to server side Node.js.

Group projects were a big part of the experience and allowed us to practice working together to solve complex problems.

Listed below are my group project highlights:

Cat Memory

This project consisted of 4 people total. I was designated as the leader for this project. My main work was done building the interactive Javascript portion of this project. I also assisted other team members with their code and questions.

Northern Health Tracker

This project also consisted of 4 people. I was again designated as the leader for this project. Integrating Chart.js into our project was my main job. I also assisted with initial planning and routing for this project.

PREVIOUS RELATIVE EXPERIENCE

Over the last fifteen years I have worked professionally as a web animator and web designer.

More specifically and coding related, over the last 4 years I have had the opportunity to work with *United Health Group*, *Doremus*, and *Greatland Homes*. These positions gave me my initial professional coding experiences.

Listed below are my highlights from these experiences:

- Email marketing template coding was learned and perfected @ UHG.

- Experience working with an online website builder Brandcast while working @ Doremus.

- Git and Squarespace (developer mode) experience while working with Greatland Homes.
